WE RECOGNIZE … The evolving capabilities and growing engagement of the private sector in contributing to all links of the value chain and accelerating innovation;

WE ENCOURAGE … Continuing dialogues and initiatives aimed at building trust, mutual understanding and cooperation between stakeholders from all sectors;

(Geneva Declaration – 2019)
WE WELCOME …

-- The opportunities for all stakeholders and the broader user community that will result from a closer collaboration among public, private and academic sectors;

-- The engagement of all sectors in addressing the societal needs through weather, climate, water and other environmental information and services;

-- The evolving role of WMO as a facilitator in establishing and expanding partnerships among stakeholders, from public, private and academic Sectors … ;

WMO OMM
WMO facilitator’s role

• Inform industry about working mechanisms, structures, rules and procedures, people

• Create opportunities for better engagement of private sector expertise and talent in the development of methodologies, standards and guidance

• Establish transparent working arrangements and procedures

• Encourage uptake of innovation from all sectors to improve systems and services

• Net effect – mutual reinforcement of stakeholders and better serving the society
WMO Technical Commissions are the bodies working on international standard and recommended practices and on design of systems and services for all Members and stakeholders.
